Installation Instructions

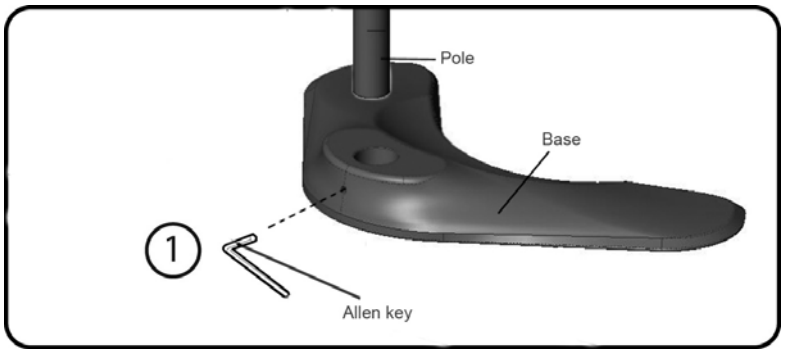
Product # 100-D16-B02 – Dual Horizontal Desk Stand

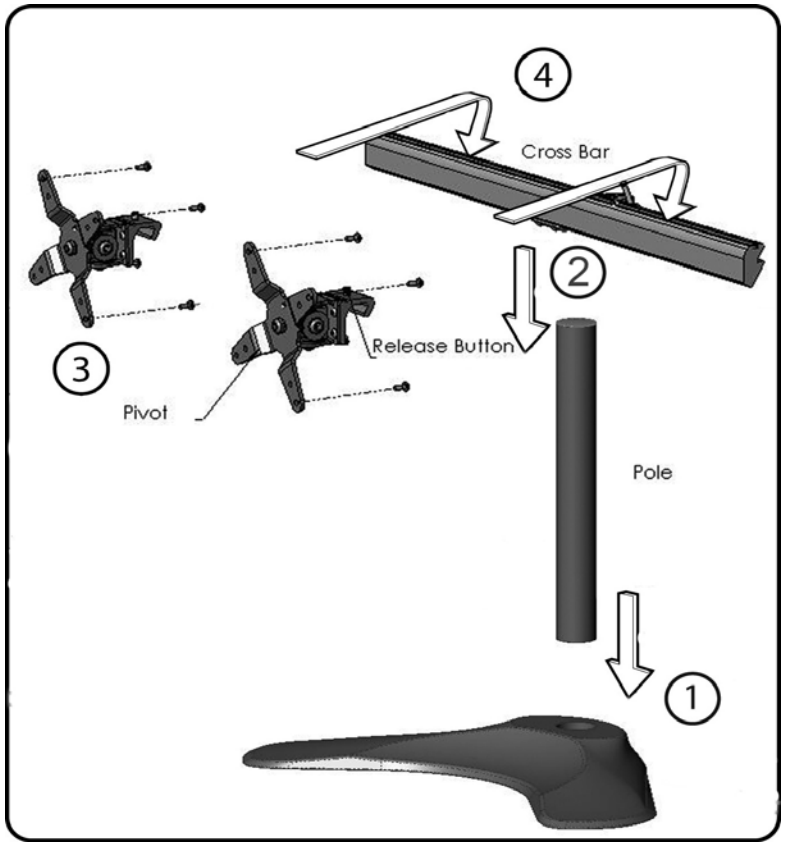
1. Check to see that small hex set screw at rear of base is backed out enough to allow pole to seat down completely. Insert pole into base. Tighten set screw.

2. Loosen ratchet type handle on pole clamp with horizontal bar (ratchet handle must be on the right side of the pole). Slide clamp and assembly over pole and tighten handle.

3. Attach quick release pivots to back of each monitor with screws provided. Be sure that silver release button is toward the top of the monitor.

4. Place each monitor on the horizontal bar by tipping back approximately 45 degrees and then down until the silver release button engages groove and clicks down into place.





To adjust monitors:

Laterally: Place hand on bottom of monitor and lift slightly to support weight. Monitor will slide along bar.

Left/Right and Up/Down: Grasp monitor with both hands and adjust to desired position.

To tension the vertical adjustment to the weight of monitor: Tighten the 5mm bolt on the right side of the pivot with the hex wrench provided.

To remove monitor: Take the weight from the monitor with one hand on the bottom and tip back slightly while using the other hand to lift the top of the silver release button. Lift up and back and this will release the monitor from the stand.
